

Telemedicine for Your Employees. Virtually Anywhere.

A Concentra Telemed® visit is just like a regular medical appointment, except that your employees remain at work and interact with a healthcare provider using a smartphone, tablet, or computer.

It's convenient.

Help your employees gain immediate medical attention at work, without traveling to a physical location for an in-office visit. Everything about it – from the easy check-in to diagnosis – is designed to make the treatment and recovery of occupational injuries easier for you and your employees. And, it's all online!

It's easy.

Just designate a private location for employees to make a telemedicine call, choose a device you want your employees to use, and have them call Concentra Telemed®. They can use any device with a video webcam and internet access to connect with both English and bilingual medical providers.

Ensure your employees get great medical advice when they need it by offering them Concentra Telemed®.

It's comprehensive.

- Minor movement injuries
- Repetitive use injuries
- Bruises, contusions, scrapes
- Sprains, strains
- Rashes, burns
- Bloodborne pathogen exposures
